

INVESTMENT OBJECTIVE

The First Global 1 BCI Enhanced Yield Fund is an income portfolio with an objective to enhance the portfolio's income yield by actively managing interest rate risk and credit risk through the interest rate cycles.

INVESTMENT POLICY

This will be achieved by making use of short-dated domestic fixed income instruments to deliver a diversified money market solution that has low volatility and high liquidity combined with carefully monitoring of its capital stability. The maximum weighted average duration of the underlying holdings will be limited to 365 days and the maximum tenor of any one instrument is 60 months. Investments to be acquired for the portfolio may include securities of an interest-bearing nature, including loan stock, debentures, debenture stock, debenture bonds, unsecured notes, preference shares of an income nature, financial instruments and any other non-equity securities which are considered consistent with the portfolio's primary objective and that the Act or the Registrar may allow from time to time. The portfolio may also invest in participatory interests and other forms of participation in portfolios of collective investment schemes, registered in South Africa. The portfolio may from time to time invest in listed and unlisted financial instruments.
